Professional Summary

Performance-driven **ServiceNow Technical Lead** with **nearly 6 years** of deep technical and consultative experience architecting enterprise-scale solutions across **ITSM, ITOM (Discovery, MID Server), ITAM (HAM, SAM)**, and **Core Platform Foundations (CMDB, CSDM)**. Proven track record leading agile technical squads within Center of Excellence (CoE) delivery frameworks, enforcing engineering governance, and orchestrating complex bidirectional pipelines using **IntegrationHub ETL and custom REST APIs**. Adept at acting as primary liaison between cross-functional business stakeholders and engineering teams to transform enterprise service management roadmaps into resilient, out-of-the-box (OOTB) aligned implementations.

Core Competencies & Technical Skills

ServiceNow Modules	ITSM (Incident, Problem, Change, Request, Service Catalog), ITOM (Discovery, Service Mapping patterns), ITAM (SAM, HAM), CSDM (Foundation through Run), HRSD, CSM, Employee Center / Service Portal
Configuration & Foundations	CMDB Class Modeling, Data Source Ingestion (SQL, File-based), Identification and Reconciliation Engine (IRE), IntegrationHub ETL, MID Server Deployment & Clustering (Docker/VM), Archive Rules
Development & Scripting	JavaScript, GlideScripting (GlideRecord, GlideAjax, GlideSystem), Business Rules, Script Includes, Client Scripts, UI Policies & Actions, Flow Designer, Custom Subflows & Actions, HTML/CSS, JSON, XML
Integrations & Spoke Dev	IntegrationHub, Custom Spoke Development, REST/SOAP APIs, Workspace ONE Integration, Microsoft Teams & SharePoint Spoke Integration, Webhooks, Transform Maps & Scripts
Governance & Leadership	Agile/Scrum Leadership, Sprint Grooming & Capacity Planning, Technical Architecture Design (TDD), Automated Test Framework (ATF), Update Set Release Governance, Code Reviews, Developer Mentorship

Professional Experience

Senior ServiceNow Consultant / Technical Lead May 2024 – Present | Chennai, India

Verizon India Pvt Ltd • Focus: ITOM, ITAM, CMDB & CSDM Architecture

- Spearhead the architecture and phased enterprise deployment of **Common Service Data Model (CSDM) across Foundation, Crawl, Walk, and Run phases**, aligning business services to underlying infrastructure and reducing reporting ambiguities by 40%.
- Direct the configuration of **IntegrationHub ETL** and advanced IRE rules, replacing legacy point-to-point imports to automate bulk CI ingestion from SQL databases and complex file feeds across critical classes (Load Balancers, IP Devices, Servers).
- Architect and maintain **ITOM Discovery patterns** and scalable **MID Server architectures**; isolated troubleshooting pipelines and streamlined configuration validation using containerized environments.
- Drive end-to-end **Software Asset Management (SAM Pro)** and **Hardware Asset Management (HAM)** lifecycle processes, leading integration initiatives with the Workspace ONE team for automated zero-touch software installations and concession device tracking.
- Act as technical squad lead across bi-weekly sprint planning, story refinement, and backlog estimation sessions; enforce code review checklists to ensure strict alignment with OOTB platform standards.
- Conduct technical risk assessments and platform upgrade evaluations to guarantee backward compatibility, data integrity, and compliance across production environments.

ServiceNow Developer / ICT Service Specialist (Acting Team Lead) Dec 2020 – May 2024 | Chennai, India

Stellantis (Fiat Chrysler Automobiles) • Focus: ITSM, IntegrationHub, HRSD & Platform Operations

- Engineered custom **IntegrationHub Spokes and reusable Subflows** connecting ServiceNow with enterprise platforms including SharePoint and Microsoft Teams, eliminating manual document routing and cutting resolution latency by 35%.
- Served as **Acting Team Lead** during operational and delivery cycles, leading offshore stand-ups, guiding 5+ developers on technical roadblocks, and serving as primary technical escalation point for client stakeholders.
- Designed complex Service Catalog portfolios, implementing dynamic workflows, multi-tiered approval chains, and Record Producers across Service Portal to support global user groups.
- Architected platform performance optimizations by establishing comprehensive **Archive Rules** and purging jobs across high-volume transaction tables, boosting query response times by 25%.
- Built regression test suites using **Automated Test Framework (ATF)** for regular family upgrades, shortening regression testing cycles and securing zero post-release incidents.
- Orchestrated release deployments via scoped Update Sets and Import Sets/Transform Maps (Users, Groups, CIs, Assignment Rules) ensuring continuous audit and change management compliance.
- Configured HR Service Delivery (HRSD) workflows, targeted communications, and executive dashboards using Performance Analytics (PA) indicators to provide leadership real-time visibility into SLA metrics.

Certifications & Credentials

- **ServiceNow Certified System Administrator (CSA)** — ServiceNow
- **ServiceNow Certified Application Developer (CAD)** — ServiceNow
- **ServiceNow Certified Implementation Specialist (CIS)** — Data Foundation (CMDB and CSDM)
- **ServiceNow Micro-Certifications:** IntegrationHub, Flow Designer, Service Portal, Automated Test Framework (ATF), Performance Analytics (PA)
- **ServiceNow Accreditations:** ITOM On Demand, Discovery Fundamentals, CMDB Fundamentals (ILT), Customer Service Management (CSM) On Demand

Education & Honors

Bachelor of Technology (B.Tech) in Computer Science & Engineering
Vel Tech University, Chennai | *Graduated: May 2020*

Honors & Awards:

- *Marvelous Multi-Tasker & Out of the Box Thinker Award* — Recognized for custom Spoke development and exemplary interim leadership.
- *Pinnacle Award (2023)* — Presented during the India Town Hall to honor outstanding engineering excellence, robust platform solutions, and effective cross-functional leadership.
